RAFIKS RUGS

Rafik's Rugs New Design System

A warm, expressive ecommerce identity built to make rug discovery easier, product presentation stronger, and every interaction feel considered.

Designed for character and conversion.

The new design feels lively, distinctive, trustworthy, and easy to shop, with a mobile-first, responsive experience.

01

Product first

Large imagery, direct pricing, clear categories, useful specifications, and visible purchase actions.

02

Warm confidence

Copper accents, quiet neutrals, plain-language guidance, shipping cues, care details, and secure-checkout messaging.

03

Editorial energy

Bold scale shifts, rounded forms, staggered reveals, tactile hero interaction, and asymmetrical product storytelling.

04

Mobile clarity

Compact section rhythm, touch-safe controls, horizontal discovery, bottom-sheet dropdowns, and simplified checkout summary.

Current implementation: React/Next.js prototype with catalog, search, cart persistence, product detail, request form, and staged checkout. Live commerce, payments, fulfillment, customer reviews, and production analytics remain integration work.

One clear journey from discovery to action.

01 · Entry

Brand loader → shipping announcement → fixed navigation

→

02 · Hero

Interactive rug reveal, campaign message, Shop All CTA, rotating product

03 · Discover

Shop by category → four brand promises

→

04 · Spotlight

Featured rug story → Add to Cart / Buy Now

05 · Browse

Collection filters, custom sort control, product grid

→

06 · Reassure

Catalog stats → sourcing request → brand story

07 · Retain

Email capture → Shop link → payment methods → policies

→

08 · Convert

Product quick view → cart → information → payment → review

Utility paths

Menu · Search · Category pages · Product pages · Shipping and returns · Rug care · Scroll-to-top

Discovery

Hero, categories, filters, search, related rugs.

Confidence

Pricing, inventory, material, origin, size, care, returns.

Conversion

Quick view, persistent cart, checkout steps, email and sourcing request.

Four directions explored.

Concepts test elegance, personality, textile cues, and recognition at ecommerce scale.

A · Expressive wordmarks

Script and ornamental serif routes feel crafted and distinctive, but lose clarity faster at navigation and mobile sizes.

B · Symbol-led routes

Woven letterforms create a direct rug cue. Mirrored RR monogram offers strongest balance of craft, legibility, and scalable recognition.

Selected direction: mirrored RR monogram with tassel terminals, supported by Rafik's Rugs wordmark and standard/white color variants.

New logo: crafted, mirrored, memorable.

Design idea

Mirrored “R” forms create a balanced monogram. Tassel terminals connect mark directly to rugs and textile craft. Copper adds warmth; high-contrast companion color keeps mark legible.

Variants

- **Standard:** light or paper backgrounds.
- **White:** dark, photographic, or copper backgrounds.

Usage rules

- Use supplied files without inversion or recoloring.
- Keep aspect ratio; never stretch or compress.
- Allow clear space equal to one tassel width.
- Use monogram-led scale in header; full lockup in loader and footer.
- Avoid busy imagery without dark contrast layer.

Warm restraint, strong contrast.

Copper
#AC7247 · Primary

Ink
#0A0A0A · Text / dark surface

Paper
#F1F0EE · Base surface

White
#FFFFFF · Clean surface

Stone
#666666 · Secondary copy

Stock green
#39704A · Availability only

Shop purple (#5A31F4) and payment-network colors remain reserved brand colors—not part of Rafik's core palette.

DISPLAY · MANROPE VARIABLE 400-500

Rooms with soul.

BODY · MANROPE VARIABLE 400

Soft, durable, and selected to ground your room with warmth and character.

UTILITY · MANROPE VARIABLE 600 / UPPERCASE / TRACKED

COLLECTION / 2026 · ADD TO CART · PRODUCT DETAILS

Hero
64–144px equivalent

Section titles
48–112px equivalent

Body
14–18px equivalent

Soft geometry meets editorial scale.

Spacing	4px micro-grid; primary section steps at 16, 24, 40, 64, and 128px.
Radius	Small controls 5–10px; feature panels 32px; pills fully rounded.
Lines	1px low-contrast dividers using ink at 14–16% opacity.
Images	Large, room-led photography; edge-to-edge crops; product detail supports gallery and zoom.
Icons	Lucide outline icons, consistent stroke weight, usually 16–20px.

Core controls

Area rugs

SALE

Featured ⌄

Search rugs ⌕

Custom dropdown replaces OS-native menus. Search appears automatically when option count exceeds six; mobile uses a bottom sheet.

Component families

Discovery

Category cards, filter pills, product cards, search results, related products.

Commerce

Quick view, size selector, quantity stepper, cart panel, staged checkout.

Trust

Shipping banner, care guidance, stock status, request form, payment marks.

Movement supports orientation.

Motion

- Loader progresses once, then clears content.
- Hero copy enters in a short stagger.
- Sections reveal on first viewport entry.
- Cards lift subtly on precise pointers.
- Reduced-motion preference removes animation.

Responsive behavior

- Desktop grid becomes two columns, then one.
- Mobile section rhythm stays compact.
- Category discovery moves horizontally.
- Panels own touch scrolling.
- Checkout summary collapses on small screens.

System intent: preserve memorable brand expression while keeping shopping obvious, accessible, and fast. New features should reuse tokens and components before introducing new visual treatments.
